Project Works:

Title: BLOOD BOON

Technologies Used: MERN Stack

Description: One of the life aspects whose importance is never faded or last in any country is the issue of health care ,As a result of this massive concern , blood donation is definitely a noble act. Many clinics and hospitals constantly require blood for several purposes all time.

- Registration required by the user to communicate for donating or accepting the blood via mobile
- Visual interface for the users to either update user information as donor via mobile
- Search for blood donors by acceptors in search engine
- Interface for acceptors to know the details about the donor
- Search for blood group in the blood banks will be available

Title: HOSPITAL MANAGEMENT SYSTEM

Technologies Used: Node JS , Mongo DB, Express, EJS, CSS, Bootstrap

Description: Hospital Management system includes registration of patients, storing their disease details into the system. It will also contain doctor's information and availability of a doctor.

Co-curricular Activities

- Volunteer in ACM Student chapter
- Coding Club Head

Achievements

- Won first price in J-HUB Hackathon conducted in state Level
- Selected for central level hackathon (SIH)
